

Catfish Processing

Released May 18, 2010, by the National Agricultural Statistics Service (NASS), Agricultural Statistics Board, U.S. Department of Agriculture. For information on *Catfish Processing* call Chris Hawthorn at (202) 720-0585, office hours 7:30 a.m. to 4:00 p.m. ET.

Catfish Processing Down 9 Percent from Last Year

Farm-raised catfish processed during April 2010 totaled 37.1 million pounds round weight, down 9 percent from April 2009. The average price paid to producers was 80.5 cents per pound for April 2010, up 2.0 cents from last month and 4.2 cents above a year ago.

Net pounds of processed fish sold during April 2010 totaled 18.7 million pounds, down 7 percent from the comparable month in 2009. Sales of fresh fish, at 7.24 million pounds, were down 1 percent from April 2009 and represented 39 percent of total sales. Frozen fish sales, at 11.5 million pounds, were down 10 percent from a year ago and accounted for the remaining 61 percent of total fish sales. Sales of whole fish represented 20 percent of the total fish sold, fillets accounted for 58 percent, and the remaining 22 percent were mostly steaks, nuggets, and value added products. The total end of the month inventory decreased 2 percent from last month but was up 13 percent from a year ago.

The total fresh and frozen average price for April 2010 was \$2.48, down 12 cents from a year ago. The average price received by processors for total fresh fish was \$2.42 per pound, down 9 cents from last year. Prices for fresh whole fish were \$1.57 per pound, down 11 cents from April 2009. Prices for fresh fillets were up 4 cents from a year ago at \$3.27 per pound. Total frozen fish averaged \$2.51 per pound, down 14 cents from April 2009. Prices for frozen whole dressed fish were up 5 cents at \$2.24 and frozen fillets at \$2.96 per pound were down 4 cents from a year ago.

Imports for consumption of *Ictalurus* spp., *Pangasius* spp., and other catfish of the order Siluriformes for March 2010 totaled 7.61 million pounds, down 15 percent from the amount imported in March 2009. Imports were from Cambodia, China, Iceland, Indonesia, Malaysia, Mexico, Spain, and Vietnam. The *Ictalurus* spp. imports totaled 1.18 million pounds, which were from China, Iceland, Indonesia and Mexico.

Fresh, boneless catfish fillet exports totaled 166 thousand pounds, with 49.6 thousand pounds going to Canada and the rest going to China and Germany. Exports of frozen, boneless catfish fillets reported for March 2010 totaled 16.5 thousand pounds, going to the Bahamas, the British Virgin Islands, and the Netherlands Antilles.

Import and export data are compiled by the U.S. Census Bureau.

Reliability of Catfish Processing Estimates

Survey Procedures: Survey data for catfish processing are collected from approximately 18 processors. All participating processors must meet the minimum criteria of having a capacity to process at least 2,000 pounds live weight of catfish per 8-hour shift. The survey is conducted entirely by NASS Headquarters staff in Washington, D.C. However, NASS field offices are responsible for informing Headquarters staff of any new processing operations in their state to ensure complete survey coverage. Processors are contacted either by mail, telephone, fax or internet. Diligent effort is made to ensure that all operations are accounted for in the estimate.

Estimation Procedures: The "Catfish Processing" report refers strictly to farm-raised fish and excludes wild capture fish. Prior to summarization, questionnaires are compared with the previous month's reports for comparable placement of data, reasonable price levels, and a reasonable inventory carryover given the sales and processing totals reported. Estimates are made for those processors whose reports are not available in time to be included in the release. These plants are identified by an asterisk on page 6 of this release. Estimates are normally based on the processor's previous report and current conditions. Published totals are a straight summation of the individual reports and estimated data. Price items are weighted by the associated volumes to compute weighted average prices. The published price for total whole fish, however, reflects an adjustment to the round and gutted only price to bring it to an equivalent dressed weight price.

If a plant uses a fiscal accounting system, prorating is used to convert reported data to a calendar month basis. Only national level estimates are published due to the limited number of plants involved.

One unique feature of the "Catfish Processing" report is the listing of cooperating processors by name on each month's release. This feature originally was used to solicit industry cooperation in maintaining coverage, but it has continued because of the processors' overall acceptance of this policy.

Import and export data for catfish, which are compiled by the U.S. Census Bureau, are also included in this report.

Revision Policy: Revisions may be necessary in the previous month's publication based on late reports received from plants. These revisions are made to improve month to month relationships. In February, all monthly estimates for the previous year are reviewed and subject to revision. This review is primarily based on data that may have been received after the original estimates were published.

Reliability: Estimates are based on a census of all known active processors and, therefore, have no sampling variability. However, estimates may be subject to errors such as omissions, duplication, and mistakes in reporting, recording, and processing of the data. These errors are minimized through strict quality controls in the edit and summarization process, and a careful review of all reported data for consistency and reasonableness.

Processing data were compiled in cooperation with the following processors:

America's Catch, Inc.
Carolina Classics Catfish, LLC
Consolidated Catfish Producers, LLC
Delta Supreme Fish Processors
Fish Breeders of Idaho, Inc.
Farm Catch Catfish Processors, Inc.
Freshwater Farms Products, LLC
Guidry Catfish, Inc.

Terms and Definitions Used for Catfish Processing Estimates:

Average Price Paid to Producers - Refers to the price of fish delivered to the processing plant door. Price includes charges for any services provided by the processing plant, such as seining and hauling, but does not include any adjustments based on year-end settlements.

Fillet - Boned sides of the fish, cut lengthwise away from the backbone. Includes regular, shank, and strip fillets; excludes any breaded products.

Fresh Fish - Fish intended for immediate consumption. Also referred to as ice-packed.

Frozen Fish - Fish which are individually quick frozen and glazed (IQF) or individually bagged and bulk frozen.

Ictalurus spp. - All species under this genus, which includes channel catfish, blue catfish, and other catfish species.

Nugget - Small fillet cuts from below the rib section of the fish and usually includes weight of breading and added ingredients.

Other Products - Includes steaks, nuggets, and all other products not separately reported including the weight of breading and added ingredients.

Pangasius spp. - All species under this genus, which includes basa, tra, stuchi catfish, and other catfish species.

Round & Gutt - Fish with no processing done or viscera only removed.

Round Weight - The term for a fish's live weight.

Siluriformes - The scientific order which contains all families of catfish.

Steak - Cross-section cuts from larger dressed fish.

Strip - Finger size pieces of fish cut from fillets and usually includes breading or added ingredients.

Whole Dressed - Weight of whole fish with only head, viscera, and skin removed. Generally, 60 percent of the live weight remains as dressed fish.

Information Contacts

Listed below are the commodity specialists in the Livestock Branch of the National Agricultural Statistics Service to contact for additional information.

Dan Kerestes, Chief, Livestock Branch(202) 720-3570
